# SPEECH THERAPY ASSISTANT PROGRAMME

## INTRODUCTION

Many a times, patients will feel frustration and isolation, due to their communication disabilities.

As a Speech Therapist Assistant, you will be able to assist people with speech, swallowing, language or communication problems.

Communication disorders may include difficulties in speech, language, voice and reading. Swallowing disorders may result from medical conditions such as stroke, cancer or respiratory diseases.

Be a part of this healing process, help your patients regain their independence and improve the quality of their lives.
